## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. Note that claim 1, in particular, is confusing because of the awkward language. Also, note in line 2 of claim 3 "heat" should be -head--.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4, as best understood, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dallman (4,279,236). Note a connecting pipe 100, heating joint 31, heating passage inside carburetor 62, output joint, i.e. the lower part of carburetor 62, and output pipe, i.e. the upper part of intake manifold 60.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3747

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dallman (4,279,236). Dallman shows everything except the connecting pipe being provided on the crankshaft case or the cylinder head. It would have been obvious to one having ordinary skill in the art to provide the connecting pipe on the crankshaft case or cylinder head in lieu of the cylinder head cover, since these alternative locations are art recognized equivalents for the purpose of withdrawing crankcase ventilation gases, and the device would function in the same way with any of the alternative locations.

#### ***Allowable Subject Matter***

Claim 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
